

Dear students,

First of all, I congratulate you for being so proactive in participating in various intra-school and inter-school co-curricular activities organized amid COVID19. You all are working hard along with your teachers who are working tremendously for successfully running online classes and setting examples for others to follow. Your feedback has not only boosted our morale but also has motivated us to go a step further in this direction. We have planned online classes from June 1, 2020 through school mobile app. Through your feedback, I have come to a realization that you all need a break from academics. So we have planned a break from academics and to relax by giving time to hobbies. We will start hobby classes from 18 May in music, dance, calligraphy, art (drawing and painting), cooking, yoga and fitness. The schedule of these classes will be available in your WhatsApp group in evening today. You can attend any number of hobbies as per your interest and use this break in refining your talent. In the meantime, you will get time to complete your written work and revise the syllabus which has been covered till now. Your teachers will be available for taking your doubts.

During this time, learn new skills. Enjoy with your family members. Help your parents in cooking and paint pictures. Play board games, watch motivational movies, see Discovery channel or watch National Geographic. Do a science experiment together or find virtual field trips of the zoo and museums. Start a book and read together as a family. Talk to them and share your thoughts with your parents. Believe me parents are your best friends. Just try.

Always remember that the greatest gift you have is a zest for living, a spirit of wonder and adventure and a confidence that the problems of life can be solved or endured.

Praying for the safety of all to the God Almighty,

Sincerely yours

Sunita Madaan
